

My Favourite (Sailing) Website and Smartphone Apps

Do you know the difference between *Phishing* and *Fishing*, a *Firewall* and a *Fire Blanket* or even '*a*' cloud and '*The*' Cloud?

Whether you do or don't - it doesn't matter! Come along to hear useful tips and stories from other members on how they use technology to make their sailing lives easier and more fun! Most of us use the internet either at home or when out and about and there is a huge range of sites relevant to sailing – some more useful than others but how do you know which are useful or whether you are missing a trick?

The evening might not make you a technology guru but hopefully you will pick up a couple of useful 'nuggets' to make your sailing experiences even better!

Join us to be Educated, Inspired and Entertained!

If you are interested in contributing to the evening either by providing us with a couple of websites or Apps that you find useful or if you would be prepared to stand up and provide a short presentation of how you use technology then please contact any member of the Committee telling us the sites or apps you really like and find useful.
